FULL STACK DEVELOPER

4+ years of experience building scalable SaaS applications for web and mobile platforms. Skilled in designing performant, maintainable systems using modern frameworks. Strong focus on clean code, architecture, and cross-functional collaboration.

PROFESSIONAL EXPERIENCE

Hikip Technologies | Full Stack Developer   Chennai | July 2024 - Present
- Led development of a **multi-tenant healthcare SaaS platform**, delivering core **web** and **React Native mobile apps**, which increased user engagement by **30%** and reduced support tickets by **20%**.
- Implemented **secure authentication and role-based access control** for 4 distinct user roles, improving access reliability and security audit compliance.
- Optimized backend task processing using **Redis caching** and **Celery**, reducing API response times by **40%**.
- Automated and maintained **Cypress tests** covering **90%** of workflows, reducing post-release bugs by **35%**.

Freelance Full Stack Developer   self-Employed | Apr 2022 - Jun 2024
- Delivered **3+ web applications** for clients, improving overall **UI/UX** and **backend performance**.
- Maintained and optimized **5+ web apps**, ensuring **UI consistency**, and **99.9% uptime**.

Billionapps Infotech Solutions | Front-end Developer   Chennai | Aug 2021 - Mar 2022
- Developed **10+ modern web applications** using **React** and **Tailwind CSS**, focusing on **performance**, **component reusability**, and **responsive design**.

Itechuniversal | Front-end Developer   Chennai | July 2020 - July 2021
- Delivered **20+ responsive web projects** with **clean UI** and **high performance**, translating **Figma designs** into **pixel-perfect**, **cross-device implementations**.

PROJECTS

Hikip Practice Management Platform – Full Stack SaaS Application
- Built and scaled a **HIPAA-compliant**, **multi-tenant SaaS platform** for healthcare providers, supporting **appointments, billing, chat**, and **AI tools** with a secure, modular architecture.
- Engineered a robust **appointment system** with recurrence, time zone logic, clinician availability, and calendar integration — reducing scheduling conflicts by **2 hours**/week per clinician.
- Designed and implemented a **dynamic survey builder** with **conditional logic** and **multi-page support**, boosting completion rates by **25%**.
- Developed an **AI-powered notes assistant** using **GPT-4** and **real-time streaming** to auto-generate clinical documentation, reducing note-writing time by **40%** and boosting clinician satisfaction scores.
- Built a secure, **real-time chat module** using **Django Channels** and **WebSockets**, with $<$**200ms latency** and **HIPAA-compliant encryption**.
